INDICATOR DESCRIPTION YEAR **CATEGORY** Score Population This first indicator measures population change. If a unit lost population, 2006 **Population** 1185 Growth then it scores a 1, otherwise it is assigned a 0. The estimates provided are 2000 **Population** 1214 from the U.S. Census Bureau. Note that the values for Year 2000 are not estimates but taken from the Census that year. Two-year growth periods of real taxable value for each unit are computed. **Taxable Value** \$113.399.843.00 2006 Real Taxable Units score a 1 if they demonstrate negative real growth, and a 0 if they Real Taxable Value \$103,980,394.35 Value Growth exhibit positive real growth. To compute real taxable value, the current year 2004 **Taxable Value** \$89,186,408.00 1.090588699 taxable value is divided by the adjusted deflator indicated to the left. \$113,399,843.00 Taxable Value 2006 Large Real This indicator uses the same data and time lag as indicator 2. The only **Taxable Value** Real Taxable Value \$103,980,394.35 difference is that a different standard is used. For this indicator, units Decrease measuring less than -0.04 receive a 1 and others are marked 0. 2004 Taxable Value \$89,186,408.00 Standard 0.16588 This indicator has no time lag and deals solely with data from within the **General Fund** 2006 **General Fund Expenditure** \$1,670,038.00 same year. To compute this variable, general fund expenditures are divided Expenditures as by taxable value. This is the only variable for which separate standards are a Percent of Taxable Value \$113,399,843.00 2006 used. A standard of 0.05 is used for cities and villages and 0.01 for Taxable Value Standard 0.01473 townships and counties. Units with ratios above the standard receive a 1 and those below score a 0. This variable is computed by subtracting general fund revenues from 2006 **General Fund Expenditure** \$1,670,038.00 General Fund general fund expenditures for a given year. This figure is then divided by General Fund Revenue Operating general fund revenue. If the number that results is less than -0.01, this \$2,014,310.00 Deficit indicates a unit has a nontrivial operating deficit and this unit received a 0.17 0 score of 1. If the unit does not have a general fund operating deficit, or if this deficit is trivial, the unit is given a 0. **General Fund Expenditure** \$1,497,311.00 Prior General This indicator captures whether a unit had an operating deficit in the past 2005 General Fund Revenue \$1,373,310.00 **Fund Operating** two years. A score of 1 is assigned for each prior year in which an Deficits operating deficit had occurred. **General Fund Expenditure** \$1,404,588.00 2004 General Fund Revenue \$1.281.233.00 The actual variable constructed for this indicator is the general fund balance Size of General 2006 **General Fund Balance** \$736,820.00 as a proportion of general fund revenue. If a unit maintains a general fund Fund Balance 0 balance less than 13 percent of its general fund revenue, it scores a 1. **General Fund Revenue** \$2,014,310.00 Conversely a general fund balance above the 0.13 level scores a 0. 0.37 Fund Deficits in **✓** If there are any fund deficits in one or more of the unit's unreserved major **Major Fund Deficit** 2006 \$58,627.00 **Current or** fund balances the unit scores a one, otherwise is scores a zero. 2005 **Major Fund Deficit** \$0.00 **Previous Year** General Long-2006 **General Long Term Debt** This variable is constructed by taking general long-term debt and dividing it \$595,956.00 Term Debt as a by the taxable value of the unit. Any unit with a debt to taxable value ratio **Taxable Value** \$113,399,843.00 Percent of above 6 percent is scored a 1 and those beneath it a 0. 0.01 Taxable Value
